Dear Mr. Bryce:

I am enclosing herewith copies of your 1943 seed orders which have gone out, also returning the copies which you loaned Mrs. Farrand to work out this year's orders.

As you probably are aware, Sutton's catalog this year was very limited in its offerings for seeds and we have had to go elsewhere for a great many sorts. I have succeeded in ordering for you all that you wanted with the exception of the following:

- 193

I have written an air-mail letter (sent Jan. 11) to Sutton to see if they could possibly supply any of these sorts. In the meantime I find that I can get from Trivett's Tested Seeds, 134-144 Washington St. New York City, those marked with a *. Do you think you would like me to order those from Trivett, or would you prefer to wait to see whether Sutton can send them? Please let me hear from you as soon as possible so that I can get the order out to Trivett if you wish me to do so.

You will note that some of the sorts ordered in this Country may be of a slightly different name but I have tried to go as nearly with the Sutton order as possible. Please let me know of any errors that are "too bad" and what I can do to rectify them.

Yours very truly,

Secretary
