HOLLIES MUST HAVE MALE AND FEMALE TREES TO PRODUCE BERRIES

HOLLYWOOD USED FOR KNIFE HANDLES AND PIANO KEYS VENEER &C

DYED BLACK AND USED AS SUBSTITUTE FOR EBONY SYMBOL OF CHRISTMAS

ROSES:— Notes — Redoute 'Best painter of roses  
Ellen Willmott's Genus Rosa (Probably out of print)  
Lindley's Monographie Rosarum (1820)

ATTAR OF ROSE - an oil manufactured in Southeastern Europe and Asia from  
R. Damascena and R. alba - now produced in Germany

Fruits of some varieties of roses made into preserves in France and England—  
probably R. villosa and R. canina

The Musk Rose (R. moschata) native of the Himalayas and known since the 16th  
century has almost disappeared - several hybrids have been produced.

John Champney produced the Noisette roses by crossing the Musk Rose with  
the blush China rose.

East Wall - Catalogue House - October 4th-1941

*Juglans cinerea* - *Juglans nigra* - *Hicoria ovata*

---

Red-tailed hawk      Cardinal      Bob White      Blue Jay

Catbird      Song Sparrow      Flicker      Chimney Swifts

Crow      Wood Pewee      Flycatcher -      Wood Thrush

---

Left Angle -      *Quercus alba*      *Quercus velutina*

---

Anemone flowered chrysanthemums      Yellow pompons

Single flowered chrysanthemums      Chrysanthemums in var.

Bush chrysanthemums      Korean hybrids      Ch.Cranfordia

Orange flowered chrysanthemum hybrids.

---

Center - framing map -      *Quercus alba* (tree)  
                                 *Fagus sylvatica* (leaves & nuts)  
                                 *Cedrus deodara*  
                                 *Cedrus libanotica*

Underneath map -- *Platanus occidentalis* - *Quercus palustris* - *Liriodendron tulipifera*      *Ulmus Americana* -  
*Pinus strobus*.

West angle --      Leaves and buttons of *Platanus occidentalis*  
                         *Toxylon pomifera* 'fruit and leaves'  
                         *Zanthoriza apiifolia*

*Ilex decidua*      *Ilex aquifolium* - *Ilex opaca*  
*Cornus florida* (berries and leaves) *Taxus baccata* (branch)  
*Euonymus verrucosus* - *Hicoria ovata* (tree) *Picea excelsa*  
*Magnolia grandiflora* (seed stalk and leaves)

Yellow blossoms on maple - follow flower into  
key - carried by wind

Call attention to native North American flowers  
as Zinniam ageratum, coreopsis, phlox -pent-  
stemons &c

Trees that grow by nature in a place we know  
how they will behave as they have proved them  
selves -others like Norwy spruce goe when  
climate no longer suits them

Explain what families the bulbs belong to--  
See McHenry - ask him how many he can handle  
and how does he get his people

What about school children's transportation?  
Colored children from the schools?  
Would McH. permit me to follow him around on  
one of his tours. Would it seem advisable  
for me to take on after he has finished with  
a group in Dumbarton Park? Ask him about how  
many he thinks sufficient for one group

Thorny twigs - honey locust - Ilexes - Euonymus  
bark - rhododendron leaves - dormant plants  
more damage from sun than severe cold.

What families each bulb belongs to - Liliaceae  
Amaryllidaceae &c

Japanese cherries - result of careful breeding  
single flowers are the big forest trees -  
double flowers are garden sports )explain  
what a sport is -how it different from variety  
Hollies - male and female to have berries  
Catalpa a windbreak in mid west

White and red oaks have rounded leaves  
Red oaks have pointed leaves - red oaks have  
red spring blossoms - white oaks have white.

West Wall - October 4th-1941

*Rhus typhina*      *Rhus vernix*      *Rhus copallina*

[illegible]

Symphoricarpos racemosa    Ampelopsis quinquefolia

*Ampelopsis heterophylla*      *Nicotiana affinis alba*

*Crataegus* Cherries Blackberries  
*Prunus* Rasp  
Straw

*Cercis* - *Leguminosae*

*Gymnocladus dioica* seeds formerly used  
as coffee substitute gum pulp. used in  
homeopathic practice

LIRIODENDRON (TULIPIFERA) TULIP TREE from the Greek Lily Tree -belongs to Magnolia family - white wood used on drawer fronts and overlays of expensive furniture. Tree grows to 150 ft or more

QUERCUS alba and Quercus rubra only oaks used for furniture. Oaks have innumerable used as timbers shipbuilding. Abraham Lincoln's birthplace built of oak logs still stands

CHERRY WOOD (Prunus serotina) is a commercial wood produced largely in the states of Virginia, Tennessee, Maryland and Pennsylvania. Used for furniture, interior trim and tool handles. Color deepens with age.

ASH (Fraxinus Americana) resists decay, wood used for washboards -drain-boards, baseball bats, agricultural tools and airplane parts.

SOPHORA Japonica (Chinese scholar tree) sometimes called Japanese pagoda tree introduced from China and Korea in early 18th century -late flowering ornamental remaining green until late in Autumn, green pods like beans.

Koelreuteria paniculata (Varnish tree) -introduced from Korea,  
China and Japan early 18th century. deciduous -conspicuous panicles  
of yellow flowers in early summer. (Ornamental)

CASTANEA dentata (American chestnut) Were it not for the devastating  
chestnut blight this tree would be among the more important commercial  
and horticultural trees of the Eastern states. Sweet edible nuts in  
burs appear in October (if the squirrels don't get there first) The bark  
is an important source of tannin for the leather industry. Wood is used  
for fence posts and railway ties

JUGLANS nigra (black walnut) Common in the Eastern half of the U.S.  
Wood has been used since earliest times for fine furniture and for many  
purposes is stronger than white oak. Used for gun stocks and airplane

airplane propellers It is durable in contact with soil. Nuts are in demand by confectioners and bakers Black walnuts among the rapid growing hardwoods.

CARYA (Hicoria) ovata Hickory nut - a distinctly American tree -often reaches 140 ft. Common in woodlots and pastures from Maine to Texas. No other hardwood as tough as hickory, but it is not durable in soil. Wood is used for hatchet handles, picks, hammers, spokes and rims of wheels and wagon shafts. The nuts are sweet and ripen in October.

CORYLUS avellana (European hazel) Deciduous shrub or small tree long cultivated in Europe for the edible nuts and for ornament. Flowers appear before leaves in Spring and nuts ripen in Autumn (perhaps)

Rosa (?) perhaps multiflora  
Hydrangea quercifolia  
Acer palmatum (2 varieties)  
Bambusa  
Viburnum plicatum (Jap. snowball)  
Ligustrum Japonica  
Syringa vulgaris

Dumbarton Oaks Planting List for Mrs. Farrand:

KITCHEN GARDEN:

North Wall - Separating Kitchen Garden from Frame Yard:

Climbing Roses - Mermaid, Silver Moon,  
American Pillar and varieties unknown

English Ivy, Ampelopsis quinquefolia and  
Ampelopsis heterophylla; Clematis paniculata

Border between fence and vegetable garden:

Dahlias (unknown variety)  
Helianthus  
Eupatorium coelestinum  
Tulips

Large Tulip Tree - Liriodendron tulipifera in Frame Yard overhanging the  
North fence of Kitchen Garden

East Side of Kitchen Garden:

On Trellis - Grapes and Clematis vines  
Clematis, Henryi, Jackmanii, Huldane,  
Montana rubens, Duchess of Albany  
Duchess of Edinburgh  
Ascotiensis - Lawsoniana Mrs. Robt. Brydon

Also Ampelopsis heterophylla

In Borders under trellis Spring bulbs - Scilla Sibirica and Muscari

South Side of Kitchen Garden:

Decorative grasses - could not find out  
what kind - similar to Pampas but not so white

Jasminum nudiflorum on walls

Myosotis and Mint in border  
also Miancelmas Daisies

West Wall - espaliered pear tree near Garden Tool House

Violets and Iris in border  
Clematis tangutica at foot of steps  
Mint beds near Tool Houses

Terrace overhanging the Kitchen Garden:

Ground cover of verbena (variety unknown)  
Delphinium - Larkspur - Spring bulbs in variety  
Helianthus - Pyracantha coccinea  
Polygonum shrub (variety unknown)  
Prunus Pennsylvanica

Dumbarton Oaks Planting List for Mrs. Farrand.

Upper Kitchen Garden (Former Cutting Garden)

*Taxus cuspidata* on three sides of Garden  
Sloping stone walls on South, North and West sides  
*Taxus cuspidata* hedge on East end bordering Bird Walk

*Jasminum nudiflorum*, English Ivy, *Ampelopsis heterophylla*  
and *Clematis paniculata* on walls

Espaliered pear trees on South, North and West walls

Two old lead cisterns on North side near Garden Tool House

Ground cover in northwest corner of *fragaria chiloensis*  
English ivy and *Ampelopsis heterophylla* - trailing *Jasminum nudiflorum*.

Iris and Iceland Poppies in Border near cistern  
*Lilium speciosum rubrum* and phlos near cistern on north side

Single white peonies (variety unknown) on terrace overhanging  
the Cutting Garden

*Digitalis* in border near North Wall of garden

Paved brick walks on three sides.

Dumbarton Oaks Planting List for Mrs. Farrand:

32d Street, wall, From Kitchen Entrance Gate to Mr. Thacher's Entrance Gate

Buxus sempervirens both sides of Gate at 1701 - 32d Street; also both sides of little Garden Gate below the Museum Building

Magnolia grandiflora espaliered to walls of Museum Building (4)

Ampelopsis Lowii  
Pyracantha Coccinea Lalandii  
Wistaria sinensis  
Jasminum nudiflorum

Hanging over wall from Copse

Ilex cranata  
Acanthopanax pentaphyllum  
Philadelphus coronarius  
Lonicera fragrantissima  
Ligustrum vulgaris  
Forsythia intermedia  
Magnolia grandiflora  
Cedrus deodara  
Acer platanoides  
Tsuga canadensis  
Spiraea prunifolia  
Jasminum nudiflorum  
One shrub unknown (Bryce promised to look it up and let me know)
