

September 28th, 1938

Miss Mary Fulkerson,  
Reef Point, Bar Harbor, Maine.

Dear Miss Fulkerson:

When Mrs Farrand was here last week, she suggested that I write you for some information which would help me in the work of the Catalog House display.

First, the stencil letter arrangements used for labeling in the files, Mrs. Farrand said you would send me the name of the people from whom you get these letters which she thinks might be helpful to me in the marking of my flower panels, inasmuch as I am no good at printing. Have you a sample you could send me?

Also, can you give me the names of two or three of the people who send French book catalogues? Mrs. Farrand gave me several clues for looking up botanical prints abroad and thought through some of those whose names were in your files I might be able to get some good material in the way of flower pictures that are not just 'pictures'

I am hard at work again after a rather hectic summer when things didn't move any too fast, and I am anxious to get through as we planned by the first of the year. If you have any suggestions please send them along; we are grateful for any new ideas. My brain doesn't seem to be working on all cylinders these days.

With kind personal regards,

Very sincerely,
