Feb 22. 47

Dear Miss Sweeney -

Forgive a pencilled letter, as I find my sketchy ideas flow better when written on my knee -

The D.O. notes are very pretty carefully revised & I'd like to send them to you to copy from time to time, unless you are already too crowded - in which case they may as well go to Mr Stover. They seem to me nearly in condition for a pre-final copy. If I may send them to you, will you please ask Mr Thacher and Mr Bliss if they would like to re-read them, or if they would prefer not to be fussed with "just one more thing" - It occurs to me that if you do the typing, you can catch mistakes made - names - plant positions or inaccuracies. Also if you do a "face" copy & one carbon,

as I hope the next copy will be the 2
final one before mimeographing or
printing. Please add comments on
where your top picture could well come
in, such as the old house, before
changes, the east lawn - entrance gates
etc.

Feb 24-47

A long letter came yesterday from Mrs. Bliss -
I've brought things over & am deciding to
send you herewith the first group of revised
sheets of D.O. When they are typed - if you
have time to do it - please give a copy to
Mrs. Bliss & ask her to hand on to Mr. T. if she
thinks well of it - & send the other copy
back to me -

Yours
B.F.

Revised

Have you in
your files
anything that
may help on
this - I am
completely in
the dark

A turf carpet may have
to be tolerated for a
time until the ground
is clean & ready for
replanting with Vinca.

If ~~Vinca~~ the use of the
green garden is likely to
interfere with the growth of
a fine carpet of Vinca,
additional paving should
be added. But a grass
carpet should not be
considered as a permanent
solution of the problem as the
colour of the turf is too yellow
a green. The scale of the grass
leaves too ~~partial~~ small.
