Order 1/19/41

Dear Mr. Thatcher -

Miss Harvey has been here to-day & we have reviewed some of the Sanbarton questions - & my "lesson" is nearly ready to recite to you -

It is going to interest me much to learn where you think I can be useful to the new order at Sanbarton, which meet of educational necessity be so different from the old - Whether you & the

Committee feel it may be a question of the fundamental preservation of the general design, if that seems appropriate to the new uses, or its considerable alteration as well as simplification.

My personal feeling is that much should be re-considered, & possibly gradual & important changes made, looking toward a permanent future when such detail will eliminate itself, in course of time -

If there is anything

Specific you would like
me to prepare for you or
bring with me, will you let
me know.

If Mr. Finley does want
to see me, will you be arrange
the time when it may best
suit you both. I fear he will
not find it too easy to arrange
to ask advice, with so much
red tape having to be un-
wound -

Looking forward to next
Thursday & Friday for

Yours sincerely,

Beatrix Farrand
