THE VALLEY CLUB OF MONTECITO
SANTA BARBARA

We are closer to-day than
on other days of the year, &
we know the reason, deep in
our hearts - My loving arms
enfold you, whether they
have to be 3000 miles long, as
from Bar Harbor in New York,
or only two miles long as for
this blessedly close neigh-
borhood -

The cyp- goes to you, & will
like to stay with you if you will
let it, it will recall our days
together in the other world when
we were younger. As you know,
it will poek & grow all in a
gas-heated room, & only needs
water when its sphagnum loses
a feeling of moisture - You will
be amused at its label, the grand
Armacost did not feel Villosum
was good enough for Hollywood.
but its good enough for the common
likes of us - Yours devoted -
Trix
